Lomba Sihar is famously known for their reputation as Hindia's sidekick while performing on stage. But now, the group consists of Natasha Udu, Baskara Putra, Rayhan Noor, Wisnu Ikhsantama, Tristan Juliano, and Enrico Octaviano would like to spread their wings to be an all-star band of Sun Eater with their own music.

lomba Sihar

With different musical backgrounds and interests of each personnel, and through each musical personality and unique sound they manage to make Lomba Sihar a true all-star line-up. Furthermore, the existence of Lomba Sihar becomes the catharsis for each member from their personal projects as an artist and a producer.

“

Natasha Udu
Vocal

Best known as Udu, she's the joker of the bunch. While her solo projects are a bop, don't be fooled by its packaging. Her songs have a very deep and often melancholic meaning that is beyond her smiles and silly antics.

Baskara brings his HINDIA flare to the group. Armed with deep charisma and honest storytelling in his songs, he brings his lyrical prowess to the table.

Baskara Putra

Rayhan Noor
Vocal, Guitar

Rayhan, a producer and multi-talented musician, known for his role as a soloist and bands such as ‘Martials’ and ‘Glaskaca’. His passion to tell the truth of his feelings and bring it to a song that is fully relatable for the mainstream audience is one that he carries with him to this group.

Also known as Tama, his producing skills is no question. He’s brought some of the line-up’s best songs to date. His sense for what’s a hit in these crowded days of local releases gives a fresh perspective for the group.

“

Tristan Juliano
Keys

Tristan's sporadic way of interacting with his instruments often leads him to a gem of a song. The multi-talented musician, known for his role in a band called 'Mantra Vutura', is able to fill in his own chords to producing his own songs just like that. Bringing a lethal weapon for Lomba Sihir.

Enrico, a professional drummer and part of a duo 'Martials', might be the most different out of the bunch, with his roots deep in rock. While often misconstrued, rock can fit in anywhere, even with this bunch. He brings the flare that might put the group's genre beyond just pop.

Enrico Octaviano
